

## **Technical Information about Pecan Nuts in Jiménez, Chihuahua.**

June, 2023

Technical Information	
Producer	JCMontap
Sample Type	Pecan Nuts
Variety	Western & Wichita
Location	Jiménez, Chihuahua
Production Cycle	2022
Category	Fancy Mammoth Halves
Count per Pound	<200
Size	+14 mm
Sensory Characteristics	
Concept	Result
Color	Light amber
Shape	Irregular
Flavor	Sweet, slightly bitter
Aroma	Mild
Texture	Crunchy
Microbiological Analysis	
Test Performed	Results
Aerobic Mesophilic Bacteria (CFU/g)	Absent
Coliform Organisms (CFU/g)	Absent
Staphylococcus aureus (CFU/g)	Absent
Salmonella	Absent
Molds (CFU/g)	Absent
Yeasts (CFU/g)	Absent
E. coli (NMP/g)	Absent
Aflatoxins	Absent

Jiménez, Chihuahua is a prime location for pecan production in Mexico. Located at the foothills of the Sierra Madre Occidental, amidst mountain systems, the semi-arid climate of the valley and the mountain runoff waters create an ideal environment for the growth of pecan trees. Jiménez has over 10,000 hectares of pecan production, which has been the main crop of the region for over three generations. The combination of an ideal climate, protected in a valley that provides water to the crops, and years of experience in pecan cultivation, make the pecans from Jiménez a product of supreme quality and unparalleled characteristics.

Concept	Description
Description	Shelled Pecan Halves and Pieces: Small, Medium, and Large. Pecan nuts of the Western and Wichita varieties; in seed pieces of different sizes that pass through a sieve with square holes of various dimensions.
Intended Use	Direct consumption, snacks, baking, ice cream, popsicles, etc.
